Dear Robert,

Last year you and I redesigned my ad, added a photo, new text and a call tracking number. It's made my business successful with a big increase in the size of jobs and profit margin. The call tracking number lets me accurately track exactly where my business's clients find me.

I'm surprised how much the phone book is used. I think it's funny that some of my clients say they are calling from the Telus-BC Tel phone book. My business isn't even listed in that book. I know you don't think it's funny.

Thanks. InfoTel.
